FREDDY MICHELENA

FULL-STACK DEVELOPER

"Forever Learning Journey".

EXPERIENCE

Tutenlabs (May 2022 – January 2024)

Rol: Developer Full-Stack Semi-Senior

Self-managed member of a team that works governed by the Agile Scrum methodology.

- Development of new functionalities and maintenance of the following portals:

  Suppliers portal: Portal intended for client suppliers. The portal has a notification system, professional maintainer, payment tray and services section.

  Stack: React, NodeJs, Java, PostgreSQL.

  Backoffice portal: Portal for the main company, where suppliers are created and functionalities are shared with the supplier portal. **Stack:** React, AngularJS, Java, PostgreSQL.

- Migration of sections of the portals with legacy code to micro-frontend shared by both portals. **Stack:** React, Webpack.
- Execution of QA test plans for new features..
- Code review of team developments.
- Review of unit tests and coverage with SonarQube.
- Personal initiative to create a Wiki in Notion for the team where I published good programming practices, git standards and relevant information to support other team members..

Intelix Synergy (December 2021 – May 2022)

Rol: Developer Full-Stack

Team member in charge of the following projects.

✓ **NIV serial generator and production correlatives for vehicles**

Features, GUI changes and maintenance. **Stack:** Java + Swing

✓ **Invoice digitization system [Technical Leader]**

Maintenance and adaptation of improvements to allow the OCR to read other documents. **Stack:** React, NodeJS, MySQL y DB2.

✓ **Attribute evaluation system [Technical Leader]**

Development team and project management. Front and back development. **Stack:** TypeScript, React, NodeJS, MySQL.
