FREDDY MICHELENA

WEB DEVELOPER

"Forever Learning Journey".

ABOUT

My name is **Freddy**, I'm a **Mechanical Engineer** and I'm looking for a career change thanks that I discovered my passion for programming.

I love solving problems and keeping myself in constant learning. I have learned in a self-taught way mainly **Front-end** development technologies.

My next goal is to learn **Back-end** technologies like **NodeJS**.

I believe that the best tools and technologies are not the most popular and sophisticated, but rather those that help you solve the most complex problems in the simplest way. That's my main interest, **use programming to solve real people's problems.**

PROJECTS

Currently I do not have professional experience as a programmer, but in my portfolio you can see some complete projects that I have done.

DISCOVER MOVIE [In portfolio | Code | Live]
Movie search engine that gives recommendations based on your interests.

- It was developed in **Angular** and styles with **Bootstrap.**
- It was developed using **TMDB API**.
- An authentication system was implemented with **Firebase**.
- A Likes functionality has been implemented to add movies and TV shows and give recommendations based on it, using **Firebase Realtime Database**.

MARVEL CLON [In portfolio | Code | Live]
Full responsive static clone from the homepage of Marvel's website.

- It was developed with **HTML** and **SASS**.
- JavaScript was used only for some animations, like slider and navbar animations.

STATS FOR STRAVA [In portfolio | Code | Live]
Web for detailed consultation of the activity statistics registered in Strava.

- It was developed in **Angular** and styles with **SASS.**
- **Angular Material** was used for some components.
- It was developed using **Strava API**.
